Education

- **GMR Institute of Technology** — Rajam, Andhra Pradesh
  Bachelor of Technology – Computer Science & Engineering; CGPA: 9.0/10 — *Dec 2021 – June 2025*

Technical Skills

- **Programming Languages**: C#, Python, Java, JavaScript, TypeScript, SQL
- **Backend Development**: ASP.NET Core MVC, Entity Framework Core, Node.js, Express.js, RESTful API Development
- **Frontend Development**: Angular, React.js
- **Databases**: Microsoft SQL Server, MongoDB, SQL Queries, Backend Data Validation
- **Testing & Automation**: Selenium WebDriver, PyTest, Page Object Model (POM), Hybrid Automation Frameworks, Data-Driven Testing, Keyword-Driven Testing, BDD
- **Testing Practices**: Functional, Regression, Smoke, Sanity, Integration & Manual Testing, Test Case Development, Defect
- **API & Security**: REST API Testing, Postman, Swagger, JWT Authentication, Role-Based Authorization
- **Tools & Practices**: Git, GitHub, Jira, Docker, Serilog, ETL, Agile/Scrum, SDLC, CI/CD Fundamentals
- **Generative AI & Developer Tools**: Generative AI, Prompt Engineering, Context Engineering, AI Agents, RAG, MCP, GitHub Copilot, Claude

Professional Experience

- **Cognizant Technology Solutions (CTS)** — Hyderabad, India
  Software Test Engineer – Quality Engineering & Assurance — *Dec 2025 – Present*
  - **Test Automation**: Developed and maintained automated test scripts using Python, Selenium WebDriver and PyTest, translating functional requirements and manual test cases into reusable automation suites.
  - **Framework Development**: Built and maintained Hybrid Automation Frameworks using Page Object Model (POM), data-driven and keyword-driven testing approaches for functional and regression testing.
  - **Test Execution**: Executed functional, regression, smoke and sanity test suites and maintained automation scripts to accommodate UI and business-logic changes.
  - **API & Database Testing**: Performed REST API testing using Postman and Swagger and validated backend data and transaction integrity using SQL queries.
  - **Defect Management**: Logged, tracked, retested and verified defects using Jira across banking workflows, supporting defect resolution and software quality.
- **Lonrix Private Limited** — Visakhapatnam, India
  Software Developer — *Apr 2025 – Sep 2025*
  - **Backend Development**: Developed and maintained RESTful APIs using ASP.NET Core MVC, C# and SQL Server for enterprise applications and business workflows.
  - **API & Database**: Designed SQL queries and stored procedures and validated REST APIs using Postman to support reliable data processing and functional correctness.
  - **Application Security**: Implemented JWT authentication and role-based authorization to secure APIs and control access based on user roles.
  - **Logging & Debugging**: Integrated Serilog structured logging and resolved application issues to improve maintainability and debugging efficiency.

Projects

- **Zing Wells – Enterprise Automation Platform** — *GitHub*
  - **Hybrid Automation Framework**: Designed and implemented a reusable automation framework using Python, Selenium WebDriver, PyTest and Page Object Model (POM), incorporating data-driven and keyword-driven testing approaches.
  - **Reusable Components**: Developed reusable Page Objects, utilities, configuration components and PyTest fixtures with failure screenshot capture and tag-based test execution.
  - **API & Database Validation**: Performed REST API testing using Postman and backend data validation using SQL queries to support application quality and reliability.
- **Smart Hotel Booking Platform – Cognizant Training Project** — *GitHub*
  - **Full-Stack Development**: Developed a hotel booking platform using Angular, Node.js, Express.js and MongoDB, supporting hotel search, booking management, reviews and administrative features.
  - **API & Authentication**: Implemented RESTful APIs, JWT authentication, role-based authorization, Mongoose database operations and centralized error handling.
- **GMR Alumni Association Portal** — *GitHub*
  - **Alumni Management Platform**: Developed a MERN-based alumni management platform with registration, networking, event management and administrative dashboard functionality.
  - **Security & Backend**: Implemented JWT authentication, role-based authorization and RESTful APIs using Express.js and MongoDB for secure resource access and data management.
